Chapter 1

Diagrams

We are proposing an online super shop management system where our customers will be able to get necessary groceries needed for everyday life, delivered to their doorsteps.

This document will contain various diagrams of our project. These diagrams will provide a better understanding to our project and what we are intending to achieve with respect to our client's demands.

1.1 Use Case Diagram

1.1.1 Extended Use Cases

Use Case ID: UC 1 Use Case Name: Create Account
Actor: Customer, Shop Manager Description: <ol style="list-style-type: none">1. Input name2. Input e-mail3. Set username4. Set Password5. Confirm Password Exception: <ol style="list-style-type: none">1. Incorrect email format2. Username already exists Precondition: <ol style="list-style-type: none">1. URL of the website Post condition: <ol style="list-style-type: none">1. Successful - Account created successfully!2. Unsuccessful - Could not create an account
Use Case ID: UC 2 Use Case Name: Login
Actor: Customer, Shop Manager Description: <ol style="list-style-type: none">1. Input name2. Input username3. Input password Exception: <ol style="list-style-type: none">1. Wrong username2. Wrong password Precondition: <ol style="list-style-type: none">1. URL of the website Post condition: <ol style="list-style-type: none">1. Successful - Redirect to homepage2. Unsuccessful - Could not login successfully
Use Case ID: UC 3 Use Case Name: Browse Catagory
Actor: Customer Description: <ol style="list-style-type: none">1. Search for items2. View item details and price Exception: <ol style="list-style-type: none">1. Wrong item information2. Item not available Precondition: <ol style="list-style-type: none">1. URL of the website2. Should have an account Post condition: <ol style="list-style-type: none">1. Successful - Select item and redirect to cart page2. Unsuccessful - Sorry, Item not available at the moment
